

Register Now! Distance Learning for Traditional Instructor-led Training Programs

For 25 years, NORCAT has become the leader in delivering excellence in health and safety training programs.

With the current physical distancing protocol, we have adapted our signature instructor-led training programs to be delivered via Zoom to ensure our clients can achieve their required health and safety training in the safety and comfort of their own homes.

Supervisor Common Core
(#770121)

OHS Construction Leadership
for Supervisors

Surface Miner Common Core
(#770210)

JHSC Certification Part 1 & 2

See reverse for more details

Training Programs now Available via Zoom

Train the Trainer

This course features instruction in adult-centered teaching methods and principles of learning. Participants will engage in lesson planning, presentation/classroom delivery, the emphasis being on skills transfer, evaluations and primarily program development. The trainer candidate should be a person of integrity with leadership qualities in his/her area of expertise but above all they must want to do the job, which is demanding.

Generic First Line Supervisor Common Core (#770141)

Participants in the program will learn to build their supervisory and team-leadership skills, communicate effectively, manage performance-related issues, and understand the supervisor's role in safety and due diligence. Based on the trainees participating in the program, our instructors will customize the program content and provide shared experiences and examples focused on industry themes relevant to the trainees.

First Line Underground Supervisor Common Core (#770121)

Participants in the program will learn to build their supervisory and team-leadership skills, communicate effectively, manage performance-related issues, and understand the supervisor's role in safety and due diligence. Based on the trainees participating in the program, our instructors will customize the program content and provide shared experiences and examples focused on industry themes relevant to the trainees.

OHS Construction Leadership for Supervisors

Accredited by the Canadian Construction Association, this program is specifically designed to provide project managers, front-line supervisors and superintendents with the skills required to lead workers on the job site while safely accomplishing tasks. Earn two credits towards the mandatory training and education credits required to achieve/maintain your Canadian Construction Association Gold Seal Certified Construction Professional designation.

Surface Miner Common Core (#770210)

Participants in this 1-Day Surface Miner Common Core program will learn the theory portion of the core minimum modules for entry to a pit, quarry, or excavation site. This includes the mandatory modules within Section 1: Surface Miner Common Core Modules. (*U5030 - Work Safely in the Job Environment, U5031 - Lock Out and Tag Equipment and Energy, U5032 - Operate Hand and Power Tools*)

JHSC Certification Training Program- Part One & Part Two (JHSC-2014-1-34924)

At workplaces where a JHSC is required, at least one JHSC member representing the employer and one member representing workers must be certified by the Chief Prevention Officer. Part One is generic to all workplaces that require both employer and worker certified members, regardless of workplace sector. Part Two of the program reviews the key concepts of Part One and then applies the knowledge and understanding of the RACE methodology to hazards that are relevant to individual workplaces.

In addition to the instructor-led courses listed above, NORCAT also offers many health and safety training programs in an eLearning platform, such as: WHMIS, Confined Space Awareness, Lock and Tag Awareness, Workplace Violence and Harassment, and AODA.
