

Health and Safety Training for Ontario's Young Workers

New and young workers are four times more likely to be injured the first month of employment than at any other time.

At NORCAT, our goal is to get workers of all ages home safe at the end of each workday. Through our à la carte proprietary blended learning programs, NORCAT offers Ontario elementary and secondary schools access to a variety of occupational health and safety courses designed specifically to provide students with the opportunity to acquire fundamental knowledge of workplace health and safety principles and practices and to help empower youth to develop positive safety habits early in their careers.

Recognizing the future of work will look different than today. NORCAT also offers customized experiential learning workshops using industry-leading technology for Grades 5-12. Contact us for more details.

Our courses are:

- Offered via e-learning, web-based platform learning, or instructor based classroom learning (*e-learning available on Apple or Microsoft platforms*)
- Aligned with SHSM, Co-Op and OYAP curriculum standards
- **Available at educational rates!**

Help empower today's youth for tomorrow's workplace.
