

OUR COMMITMENT TO OUR CUSTOMERS IS TO PROVIDE WORLD CLASS TIRE SERVICES BY EFFECTIVELY MANAGING YOUR FLEET

WE STRIVE TO INCREASE TIRE PERFORMANCE, MAXIMIZE VEHICLE UTILIZATION & ASSET MANAGEMENT; WE ARE DRIVEN BY OUR PASSION TO ENSURE EVERY SINGLE ONE OF OUR CUSTOMERS GET THE MAXIMUM VALUE FOR ALL THE SERVICES AND TIRES THEY INVEST IN.

AT THE END OF THE DAY OUR REWARD IS IN KNOWING THAT WE ACHIEVED WHAT WE SET OUT TO ACCOMPLISH, IMPROVING YOUR FLEET PERFORMANCE!

Fountain Tire

Capitalize On Your Equipment's Availability

The art of understanding & managing your mining tire capabilities, by Fountain Tire.

TIRE MANAGEMENT

Fountain Tire's On-Site Tire Management Services ensures tire life is maximized while providing the highest safety standards, equipment availability and productivity.

Tire Management Values offers many benefits, including:

- Safer operation
- Increase operator awareness
- Fully certified OTR tire technicians
- Comprehensive tire life-cycle
- State-of-the-art retreading
- Reduction of operating cost
- Increased equipment availability

A program tailored to assist mines in developing a tire and wheel management program that suit's your application and needs.

Features of a tire and wheel management program include:

- Improving tire and wheel related safety
- Reducing tire-cut damage through measures such as maintaining clear surfaces in loading and dumping areas, reducing spillage on ramps or haul roads.
- Preventive maintenance for damaged tires, including timely removal of tires before they become non-repairable

- Operating tires within their capabilities, through matching tire load and speed capacity and tire pressures are maintained at recommended levels daily.
- Implementing wheel certification programs to track each wheel's condition throughout its operating life

Our Program includes several steps to further increase the life of tires and wheels, through:

- On-Site tire service & management
- Mine site audits
- Weight studies
- Tire and compound selection
- On-site trained personnel to ensure the safe use and operation of tires and wheels
- Operator awareness training, focussed on increasing the importance of operator alertness

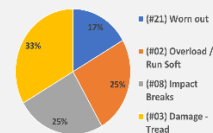

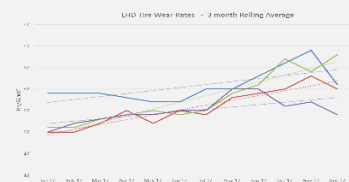

FAST FACTS

Data generated from FT in the last 12 Months:

Tires being Tracked	3,861
Tracking Entries	164,549
Tire Scrapped and Reported	1809
Tire Removal and Installs	7670
Total Tire Hours of History	3,783,234 hrs.

RESULTS

Generally properly managed fleets see tire performance increased by 17% to 26%
