

Pulse® Pro Bulk Fluid Management Systems

- ✓ Automatically track every drop of fluid dispensed
- ✓ Share information in real time
- ✓ Capture lost costs & uncover hidden profits
- ✓ Integrate data seamlessly with your DMS
- ✓ Minimize costs with wireless configuration

TRACK BULK FLUIDS WIRELESSLY, AUTOMATICALLY, ACCURATELY

Technicians dispense immense amounts of bulk fluids - oils, coolants, gear lube, windshield wash and more. Pulse® Pro Fluid Management systems offer advanced wireless technologies to accurately track bulk fluid activities and monitor inventory from storage tanks to dispense meters – from the service bay to the back office – so key stakeholders can share real time information and make more informed decisions to simplify operations, capture previously lost or unassigned costs and uncover hidden profits.

- **Transparency** - Automatically monitor exactly how much fluid is dispensed, where, and by whom to minimize shrinkage, rounding and invoice discrepancies.
- **Accurate Billing** - Pair every dispense directly with a work order to simplify billing and maximize profit margins.
- **Inventory Management** - Monitor fluid inventory and schedule refills to minimize delays and excessive costs.
- **Accountability & Insight** - Track issues to the source via advanced technology, including automated alerts and customizable reports, to make more informed decisions.
- **Wireless** - Fast, easy configuration reduces installation costs and eliminates the need for PC connection.
- **Scalability** - Add new Pulse components quickly and seamlessly into almost any environment as your demands grow. Retrofit applications or multiple buildings within the same facility and avoid excessive installation costs and delays.
- **Integration** - Capture and integrate data seamlessly with your DMS. Share information quickly throughout your organization to improve scheduling, inventory, procurement, pricing and more.
- **Efficiency** - Avoid surprises, interruptions and delays. Fluids are tracked and recorded instantly and automatically, so technicians can spend more time in the service bay – serving more customers.
- **Portability** - Pair with mobile dispense units and drums easily to reduce extra steps and hassles for technicians.

UNCOVER HIDDEN PROFITS - AND AN EASIER WAY TO WORK

Use Pulse® Pro Fluid Management to take full control of your bulk fluids in the field, fleet or service center - anywhere you need to monitor and measure fluid dispenses. Because it's completely wireless, comprising only two components, it can be installed quickly to simplify bulk fluid management and maximize profitability in almost any environment.

Pulse Dispense Meter

Technicians can enter pin codes and other data quickly on the meter's large, intuitive display, or they can flash an NFC tag to the screen to get started. All data is tracked directly to the meter, technician and work order.

Pulse Tank Level Monitor

Record tank levels automatically with an ultrasonic sensor. Customized daily reports detailing volumes, level alerts and more can be sent instantly to key stakeholders.

Pulse Pump Air Controller

Shut off air to the pump automatically when not in use to prevent costly spills from broken lines.

Roll Around

Dispense fluids anywhere in your shop without compromising security or productivity. Technicians can use the sturdy drum cart to transport 55-gallon containers to the dispense site easily without assistance or delays.

Pulse Hub

Simply connect the Pulse Hub to a power source and access your local network to get started - without software or a PC. Access monitoring and reporting tools instantly from any network-connected, web-enabled device, including a PC, tablet or smartphone.

Pulse Extenders

Choose from multiple devices to extend the reach of Pulse Pro® throughout your facility.

Pulse Software

Get a quick, consolidated view of all dispenses for the entire shop via specially-designed, web-enabled and easy-to-use software. Track tank levels in a glance. Generate customizable reports and automated email alerts to share critical information instantly.

DMS Integration

Integrate fluid management with popular DMSs to help validate work orders. With every dispense, data is recorded and delivered to the DMS, where other users can access the information to improve decision-making throughout the shop.

Features of the Pulse Pro® Fluid Management System:

- Compatible with petroleum and synthetic based oils (including automatic transmission fluid and gear lube), anti-freeze and windshield wash solvent.
- Certified for interfacing with common dealer management software providers, such as Reynolds & Reynolds®, CDK Global® (formally ADP), AssetWorks, Procede Software, Dealertrack and PBS Systems (DMS.gracopulse.com).
- Operates on 100-240 VAC line voltage for wired products and AA alkaline batteries for battery powered devices.
- Software access through all major web browsers.
- High-flow meters up to 18 GPM (68 LPM).
