

FLO Components Lube Training Seminars

WHAT YOU NEED TO KNOW

Improper lubrication accounts for 53% of all bearing failures, a major cause of equipment downtime and significant unnecessary maintenance costs. FLO Lube training seminars are designed to help you avoid these failures by **turning your personnel into Lubrication Specialists**. FLO Components Seminars maintain a balance of theory and practical - time allocation: 50% in class, 50% "hands on" training, using working demo panels, components, tools and cutaways. Each is designed and presented as an unbiased, 3rd party lubrication training program - **we don't sell to you, we teach you** what you need to know.

SEMINAR TOPICS

Seminars can be held on-site or off-site, and typically run between 3 to 7 hours. Seminar content is customized to the specific requirements of each customer. Below is a listing of the types of topics often included:

- ✓ Basic principles of friction, lubricants and lubricant types
- ✓ Handling and transfer of lubricants
- ✓ General lubrication system and equipment knowledge and practices
- ✓ Explain the reasons for an Automatic Grease System
- ✓ System terminology and component identification and explanation
- ✓ General system layout and operating parameters
- ✓ Inspection and trouble-shooting procedures
- ✓ Component operation training, including: pump and valve operation, major component identification, vent valve operation, and pump ratios in relation to system operating pressures
- ✓ For Plant Personnel, specific system operation and trouble-shooting regarding the "Dual Line Parallel" type lube systems typically found in mines.
- ✓ For Mobile Personnel, specific system operation and trouble-shooting regarding the "Single Line Progressive and Parallel" lube systems typically found in mines.

Over the last ten years, FLO has conducted over 60 seminars in cities across Ontario and Manitoba, and similar customized seminars for various organizations such as STLE (Society of Tribologists and Lubrication Engineers), Mohawk College and OHMPA (Ontario Hot Mix Producers Association). Lectures, demonstrations and dynamic, hands-on exercises are all used to teach the principles of lubrication and equip your personnel for dealing with various lubrication issues in your demanding work conditions. When your maintenance people or plant supervisors apply what they learn, your payoff is immediate and permanent.

Call us today to discuss a training seminar, customized to your specific company requirements.
